EDUCATION

Sejong University

B.Eng. in Artificial Intelligence (Expected Feb. 2027)

Gwangjin, S. Korea

Mar. 2021 – Feb. 2027

- Relevant Modules: Machine Learning, Deep Learning, Digital Signal Processing, Image Processing, Natural Language Processing, Computer Structure
- GPA: 4.36/4.5

RESEARCH EXPERIENCE

Pattern Recognition & Machine Learning Lab

Undergraduate Researcher, Advisor: Chang-Jae Chun

Sejong University

Jan. 2024 – Present

- Conducting research on improving accuracy prediction of protein-protein docking models using Explainable AI (XAI) and ensemble models
- First-author manuscript in preparation

Gachon X Sejong University Joint Academic Conference

Undergraduate Researcher, Advisor: Haemin Cho

Gachon University

Jul. – Aug. 2025

- Conducted independent research on Comparative Analysis of Music Embedding Quality under Different Segmentation and Aggregation Strategies
- Evaluated transformer-based and pooling-based aggregation strategies on the MARBLE benchmark using the MuQ embedding backbone, analyzing trade-offs between performance and efficiency
- Authored an undergraduate research paper on *Comparative Analysis of Music Embedding Quality under Different Segmentation and Aggregation Strategies*

Generative Artificial Intelligence Lab

Undergraduate Research Assistant, Advisor: Hyewon Jang

Sejong University

Jul. – Aug. 2024

- Participated in the NRF-funded project *"Research in STEM Education Policy in the Era of Post-Artificial Intelligence"*
- Assisted in experiments for the study *"Less is more: A multimodal exploration of how limited AI shapes team physics problem solving"*
- Conducted data collection and supported multimodal analysis (Gaze Estimation, Pose Detection) for collaboration research
- Analyzed participant interaction using computer vision techniques to study the impact of limited AI on team problem solving

PUBLICATIONS

- **Jaeha Yoon**, Nayeon Kim, Donghyuk Kim, and Chang-Jae Chun*, "A Multi-level Stacking Ensemble for Protein Structure Quality Prediction", *The Korean Institute of Communications and Information Sciences (KICS) Winter Conference*, 2026
- Shinye Hwang, **Jaeha Yoon**, Chang-Jae Chun*, "Ensemble-Based Quality Assessment Model for Protein Docking Candidate Structures", *The Korean Institute of Communications and Information Sciences (KICS) Winter Conference*, 2026
- Donghyuk Kim, **Jaeha Yoon**, Chang-Jae Chun*, "Efficiency Analysis of LHS-Based Sampling Across Different Data Usage Ratios", *The Korean Institute of Communications and Information Sciences (KICS) Winter Conference*, 2026

PROJECTS

MUSEED: AI-Powered Music Discovery Platform

Sejong University

Python-based Deep Learning Course Project

Sep. – Dec. 2025

- Developed a lightweight playlist generation platform using Self-Supervised Learning (SimCLR) to fine-tune the MuQ backbone, achieving 57% parameter reduction while outperforming teacher models.
- Engineered an event-driven asynchronous architecture with FastAPI, Redis, and Celery, and implemented FAISS vector search to reduce retrieval latency to under 0.1 seconds.
- Designed a full-stack web service utilizing Next.js for user-uploaded audio analysis and social discovery features.

AI-based Dormitory Roommate Matching & Management Service

Sejong University

13th Sejong University SW·AI Hackathon (Silver Prize)

Dec. 2025

- Implemented a roommate matching system using text embedding similarity to analyze user preferences and lifestyle patterns.
- Developed an automated facility repair request feature utilizing computer vision to classify failure types and severity, outputting structured JSON data for automated processing.
- Engineered a duplicate report detection algorithm by analyzing image similarity and report content to streamline maintenance workflows.

KT Community Problem-Solving Project

KT & Jongno-gu Office

Project Developer

Jul. – Aug. 2025

- Developed the official notification chatbot for Jongno-gu Office to send alerts on public assemblies.
- Developed a pipeline to automatically extract traffic control information by crawling bus route data and leveraging a Large Language Model (LLM) for parsing
- Built a notification service API to provide real-time alerts on traffic disruptions

Smartwatch-based Cognitive Function Prediction System
Biomedical AI Course Project

Sejong University
Mar. – May. 2025

- Led end-to-end development of an AI system predicting cognitive function from smartwatch data, including data collection, preprocessing, feature engineering, and deep learning model design and execution

EXTRACURRICULAR ACTIVITIES

Artificial Intelligence and Big Data Course TA
Undergraduate Teaching Assistant

Sejong University
Sep. – Dec. 2025

- Facilitated Q&A sessions, evaluated assignments, and proctored exams to support student learning and course administration.

AI Malpyeong
Everyday Conversation Summarization Competition

National Institute of Korean Language
Jul. – Aug. 2024

- Fine-tuned LLM using QLoRA and few-shot prompt tuning to summarize daily conversations

ESCAPER (University Central Jiu-Jitsu Club)
President

Sejong University
Sep. 2024 – Present

- Served as President of the Sejong University Jiu-Jitsu Club, organized joint training with Konkuk University, and established a partnership with Flame Stone Jiu-Jitsu

Republic of Korea Army – Transport Battalion
Driver, Sergeant

Gangwon-do, S. Korea
Mar. 2022 – Sep. 2023

- Completed an AI Education Program (hosted by Elice Inc.), including projects on sensor-based fault classification and time-series analysis of historical WWII data.

Student Council
Member of Planning Department

Sejong University
Mar. – Jul. 2021

- Contributed to establishing the foundation of the newly created AI Department Student Council
- Planned and organized student events and academic activities to strengthen the department community

HONORS & AWARDS

KT Digital Talent Scholarship

Mar. 2025 – Present

- Selected as a recipient for a competitive scholarship program supporting outstanding students in ICT and AI fields

Silver Prize, 13th Sejong University SW·AI Hackathon	Dec. 2025
KT Digital Talent Award – “D-Injae’s Pick”	Aug. 2025
<ul style="list-style-type: none"> • Popular Choice for KT Community Problem-Solving Project 	
Bronze Prize, 2025 AI Challenge	Jun. 2025
<ul style="list-style-type: none"> • Sejong University 	
Academic Excellence Scholarship, First Semester 2025	Jun. 2025
<ul style="list-style-type: none"> • Ranked 3rd in Academic Standing • Declined offer due to reception of another scholarship 	
Grand Prize, 2024 English Speaking & Presentation Contest	Dec. 2024
<ul style="list-style-type: none"> • Sejong University 	
Encouragement Award, 2024 College Academic Festival	Dec. 2024
<ul style="list-style-type: none"> • Sejong University, Software Convergence College, Planning Track 	
Bronze Prize, 2024 AI Challenge	Nov. 2024
<ul style="list-style-type: none"> • Sejong University 	
Academic Excellence Scholarship, First Semester 2024	Jun. 2024
<ul style="list-style-type: none"> • Ranked 3rd in Academic Standing 	
Encouragement Award, 10th Sejong University SW·AI Hackathon	Oct. 2021
